TITLE : PACKED BODY SEALING FAILURE
 INSPECTING METHOD

BEST AVAILABLE COPY

ABSTRACT : PURPOSE: To provide a packed body sealing failure inspecting method for automatically discriminating the sealing quality of a packed body storing contents with fluidity by seal-packing.

CONSTITUTION: A packed body 1 storing contents such as powdery oxygen absorbent with fluidity by four-way seal packing of upper edge side (d), lower edge side (a) and lateral edge sides b, c is position-fluctuated so that the oxygen absorbent 2 comes in uniform contact with each seal part, and then image processing is performed using an inspecting visual device 3 formed of a CCD camera 4, a controller 5 and a display device 6. The image is compared with the prestored normal image to detect the packed body with the contents entered a sealing failure part.
